Phenol-99% Technical Data Sheet

Product ID: PH99-475

Synonyms: Carboic acid; Phenylic acid; Hydroxybenzene; Monohydroxybenzene; Phenyl hydroxide

CAS#: 108-95-2

Sales Specifications:

Purity (by GC): 99.6% Min.

Water: 0.1% Max.

Solidification Point: 40.6°C Min.

Color: 20 APHA Max.

Appearance: Molten: Clear, water-white liquid

Solid: White crystalline mass

Packing: 475 lbs. net drum

Physical Properties:

Appearance: White crystalline solid

Color: 20 APHA max.

Odor: Sweet, aromatic

Specific Gravity (50°C.): 1.05 g/mL

Melting point/freezing point: 40.9°C (106°F)

Initial boiling point/range: 181°C (358°F)

Flash point: 79.4°C (174.92°F)

Vapor pressure: 0.26 hPa at 20°C (68°F)

Relative density: 1.05 @ 50°C.

Solubility: Water, 84 g/L at 20°C.

Partition coefficient: n-octanol/water: log Pow: 1.47

Auto-ignition temperature: 715°C (1319°F)

Molecular Formula: C₆H₆O

Molecular Weight: 94.11 g/mol

Product Description:

Kessler Chemical is a leading supplier and distributor of high-purity Phenol. Kessler Chemical works closely with leading suppliers to offer the high quality Phenol that you need for your applications.

Phenol, also known as carboic acid, is an aromatic organic compound with the molecular formula C₆H₅OH.

Phenol is produced on a large scale (about 15 billion lbs./year) from petroleum. It is an important industrial commodity as a precursor to many materials and useful compounds. Because of phenol's commercial importance, many methods have been developed for its production. The dominant current route (approximately 95% of production) is the Cumene process, which involves the partial oxidation of Cumene (isopropylbenzene) via the Hock Rearrangement. Acetone is produced as a by-product.

The major uses of phenol are in the manufacture of plywood adhesives and plastics. About two-thirds of its production involves the conversion to precursors for plastics, such as polycarbonates, epoxies, nylon, and phenolic resins. Other uses include detergents, herbicides and numerous pharmaceuticals. Phenol is also being used in battery energy storage applications.

Chemical producers and buyers rely on Kessler Chemical for their Phenol needs. We offer the quality, availability and technical knowledge you are looking for in a Phenol supplier. Let Kessler Chemical work for you!
